Hon. Commissioner of Patents and Trademarks Washington, D. C. 20231

March 5, 2002

PRELIMINARY AMENDMENT

Sir:

Preliminary to examination, please amend claims 378 as attached herewith.

REMARKS

The preliminary amendment has been filed herewith to change multiple dependency of claims 3-8 to single dependency.

Respectfully submitted, KANESAKA AND TAKEUCHI

AMENDED CLAIMS

Version with markings to show changes made (Marked-up version)

- 3. (Amended) The method for manufacturing a synthetic resin molding according to Claim 1 [or 2], wherein an average particle size of the granulated thermal expansion microcapsules is 7 to 100 mesh.
- 4. (Amended) The method for manufacturing a synthetic resin molding according to [any one of Claims] claim 1. [to 3] wherein the thermal expansion microcapsules are granulated with a given weatherability additive.
- 5. (Amended) The method for manufacturing a synthetic resin molding according to [any one of Claims] claim 1. [to 4] wherein the thermal expansion microcapsules are granulated with a given pigment.
- 6. (Amended) The method for manufacturing a synthetic resin molding according to [any one of Claims] claim 1_{L} [to 5] wherein the base resin is an olefin resin with a melt flow rate (MFR) of 30 to 90 g/10 min.
- 7. (Amended) The method for manufacturing a synthetic resin molding according to [any one of Claims] claim 1_{\star} [to 6] wherein during injecting the base resin into a mold using an injection molding machine, the granulated thermal expansion microcapsules are input

from a vent port in the middle of a cylinder in the injection molding machine.

8. (Amended) The method for manufacturing a synthetic resin molding according to [any one of Claims] claim 1, [to 6] wherein in two-material molding, a material to be a core is a recycle resin containing the granulated thermal expansion microcapsules.
